

CHEAR SPEECH TEST APP

These apps have been developed to present words from an i-Pad. Four response choices are represented by pictures on the i-Pad.

The Chear Speech Test Apps derive information on the speech sounds that a child can discriminate through their hearing technology.

Words are presented in the sound field via a 2-channel audiometer in quiet or noise. It can be used with a standalone speaker using the calibration noise at outset.

Testing takes about 5 minutes and derives percent-correct score and the confusions made are stored in an output file.

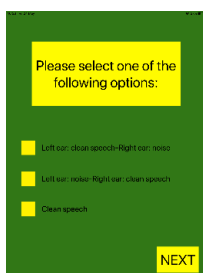

Price £195/app/year

For more information on how to download Chear Speech Test Apps, please contact us either by phone or email.

CCT Consonant Confusion Task

40 items (10 sets of 4)

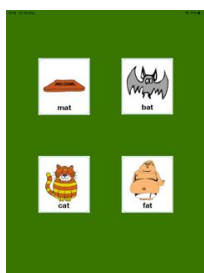

Based on familiar vocabulary for children from age 2-3 years
