

**HEARING AIDS:**

[January 2020, valid for 6 months]

For adults, the cost of buying a hearing aid includes all hearing assessment and fine-tuning appointments in the first year from the date of the hearing-aid fitting.

Further appointments are charged at a typical review appointment cost of £75.

The price includes a further reminder for an appointment 5 years after the fitting. Batteries are provided for the first 6 months of use.

A hearing aid trial takes place over 4 weeks from date of fitting, and is charged at £95 per device.

If a second hearing aid is purchased at the same time, £200 is deducted from the purchase cost for two devices.

**Please Note:**

The most suitable hearing aid for a particular hearing loss is not necessarily the most expensive. The important factors are the quality and comfort of the fitting for a client's hearing loss and lifestyle.
